# PROCEEDINGS

OF THE

## PHYSICAL SOCIETY OF LONDON,

*From December 1913 to August 1914.*

VOL. XXVI.

LONDON :

"THE ELECTRICIAN" PRINTING & PUBLISHING COMPANY, LTD.,

1, 2 & 3, SALISBURY COURT, FLEET STREET, E.C.

MDCCCXIV.

LONDON :

PRINTED BY GEORGE TUCKER, SALISBURY COURT, FLEET STREET, E.C.

# CONTENTS.

VOL. XXVI.

	PAGE
Proceedings at the Meetings of the Physical Society of London, Session 1913-1914.....	vii.
The Ice Calorimeter. With Remarks on the Constancy of the Density of Ice. By EZER GRIFFITHS, B.Sc., Fellow of the University of Wales .....	i
An Electrostatic Oscillograph. By H. HO, Prof. of Electrical Engineering, Imperial University, Tokio, and S. KOTO, Asst. Prof. of Electrical Engineering, Imperial University of Kyushu.....	16
On the Thermal Conductivity of Mercury by the Impressed Velocity Method. By H. REDMAYNE NETTLETON, B.Sc., Assistant Lecturer in Physics at Birkbeck College .....	28
Polarisation and Energy Loss in Dielectrics. By A. W. ASHTON, D.Sc., M.I.E.E., Battersea Polytechnic, Batter- sea, S.W. ....	43
A Lecture Experiment to Illustrate Ionisation by Collision and to show Thermoluminescence. By F. J. HARLOW, A.R.C.S., B.Sc., Assistant Lecturer in Physics, Sir John Cass Technical Institute.....	55
An Experimental Method for the Production of Vibrations on Strings illustrating the Properties of Loaded or Un- loaded Telephone Cables. By J. A. FLEMING, M.A., D.Sc., F.R.S. ....	61
On the Moving Coil Ballistic Galvanometer. By R. LL. JONES, M.A., The Presidency College, Madras .....	75

	PAGE
A Note on Aberration in a Dispersive Medium and Airy's Experiment. By JAMES WALKER, M.A.....	82
The Thermal Expansions of Mercury and Fused Silica. By F. J. HARLOW, A.R.C.S., B.Sc., Assistant Lecturer in Physics, Sir John Cass Technical Institute .....	85
Some Characteristic Curves and Sensitiveness Tests of Crystal and Other Detectors. By PHILIP R. COURSEY, B.Sc., Assistant in the Electrical Engineering Laboratory, University College, London .....	97
A Water Model of the Musical Electric Arc. By W. DUDELL, F.R.S.....	117
Some Further Experiments with Liquid Drops and Globules. By C. R. DARLING, A.R.C.S. ....	118
On Vibration Galvanometers of Low Effective Resistance. By ALBERT CAMPBELL, B.A.....	120
Vacuum-tight Lead-seals for Leading-in Wires in Vitreous Silica and other Glasses. By HENRY J. S. SAND, Ph.D., D.Sc. ....	127
The Asymmetric Distribution of the Secondary Electronic Radiation produced by X-Radiation. By A. J. PHILPOT, B.Sc., Layton Research Scholar, University of London, King's College.....	131
Time Measurements of Magnetic Disturbances and their Interpretation. By C. CHREE, Sc.D., LL.D., F.R.S. ....	137
A Lecture Experiment on the Irrationality of Dispersion. By Prof. S. P. THOMPSON.....	154
On the Ratio of the Specific Heats of Air, Hydrogen, Carbon Dioxide and Nitrous Oxide. By H. N. MERCER, B.Sc., Research Student at the Imperial College of Science and Technology, London, S.W.....	155
A New Type of Thermogalvanometer. By F. W. JORDAN, A.R.C.S., B.Sc.....	165
An Instrument for Recording Pressure Variations due to Explosions in Tubes. By J. D. MORGAN .....	172

	PAGE
The Direct Measurement of the Napierian Base. By ROLLO APPLEYARD, M.Inst.C.E.....	178
Introduction to the First Guthrie Lecture. By Prof. G. CAREY-FOSTER, F.R.S. ....	183
Radiation of Gas Molecules Excited by Light. By R. W. WOOD, Professor of Experimental Physics, Johns Hopkins University, Baltimore .....	185
A Graphic Treatment of Cusped Wave-fronts and of the Rainbow. By WILLIAM R. BOWER, B.Sc., A.R.C.S., Technical College, Huddersfield.....	212
On Gyrostatic Devices for the Control of Moving Bodies. By JAMES G. GRAY, D.Sc., F.R.S.E., Lecturer on Physics in the University of Glasgow.....	224
Volatility of Thorium Active Deposit. By T. BARRATT, A.R.C.S., B.Sc., and A. B. WOOD, M.Sc.....	248
The Passage of $\alpha$ -Particles through Photographic Films. By H. P. WALMSLEY, M.Sc., and W. MAKOWER, M.A., D.Sc. ....	261
On a Null Method of Testing Vibration Galvanometers. By S. BUTTERWORTH, M.Sc., Lecturer in Physics, School of Technology, Manchester .....	264
Note on the Connexion between the Method of Least Squares and the Fourier Method of Calculating the Co- efficients of a Trigonometrical Series to represent a given Series of Observations of a Periodic Quantity. By CHARLES H. LEES, D.Sc., F.R.S.....	275
A Magnetograph for Measuring Variations in the Horizontal Intensity of the Earth's Magnetic Field. By F. E. SMITH, A.R.C.Sc. (From the National Physical Laboratory).....	279
The Atomic Weight of Copper by Electrolysis. By ALBERT G. SHRIMPTON, B.Sc., L.C.C. Paddington Technical Institute .....	292
Note on an Improvement in the Einthoven String Galvano- meter. By W. H. APTHORPE.....	314

	PAGE
On Atmosphere Refraction and its Bearing on the Transmission of Electromagnetic Waves Round the Earth's Surface. By J. A. FLEMING, M.A., D.Sc., F.R.S.....	318
Atmospheric Electricity Observations made at Kew Observatory. By GORDON DOBSON, B.A.....	334
Thermal and Electrical Conductivities of Some of the Rarer Metals and Alloys. By THOMAS BARRATT, A.R.C.S., B.Sc.....	347
Some Investigations on the Arc as a Generator of High Frequency Oscillations. By F. MERCER, B.Eng.....	372
Report of the Committee on Nomenclature and Symbols....	381
Production of Very Soft Röntgen Radiation by the Impact of Positive and Slow Cathode Rays. By Sir J. J. THOMSON, O.M., F.R.S.....	388
Alphabetical Index .....	391
